Monroe County Gigabit Broadband Project
c/o 311 Skyport Road
Galbraith House
Mechanicsburg, PA 17050

To the Leaders of the Monroe Gigabit Project:

We at Ben Franklin Technology Partners of Northeastern Pennsylvania are fully supportive of the Monroe Gigabit Project. We have had project collaborations with both manufacturing and early stage technology companies in Monroe County, and we know that they will benefit greatly from improved broadband services. We therefore encourage all local businesses in the County to get involved and work together to improve the County's technology infrastructure.

We also have a very close association with the business accelerator program at the East Stroudsburg University Innovation Center. This program is incubating start-up technology companies that ultimately will help boost the regional economy and create more jobs in Monroe County. Such companies clearly can benefit from improvements to the infrastructure.

Given our relationships described above, we hope that the Monroe Gigabit Project will be hugely successful.

Sincerely,

Robert S. Thomson, III
Regional Manager
